

# Power Up

Use the first calculation to create more number facts.

I know  $\rightarrow 5 \times 7 = 35$

So  $\rightarrow 5 \times 70 = 350$

So  $\rightarrow 5 \times 700 = \boxed{\phantom{000}}$

So  $\rightarrow 50 \times 7 = \boxed{\phantom{00}}$

So  $\rightarrow 500 \times 7 = \boxed{\phantom{000}}$

I know  $\rightarrow 3 \times 4 = 12$

So  $\rightarrow 3 \times 40 = \boxed{\phantom{00}}$

So  $\rightarrow 30 \times 4 = \boxed{\phantom{00}}$

So  $\rightarrow 60 \times 4 = \boxed{\phantom{00}}$

So  $\rightarrow 3 \times 400 = \boxed{\phantom{000}}$

So  $\rightarrow 3 \times 80 = \boxed{\phantom{00}}$

So  $\rightarrow 300 \times 4 = \boxed{\phantom{000}}$

I can use the first fact and place value to work out the related questions.
